

# Set Up & Data Collection

Deploy your container, then log into the Web GUI. Then navigate to Home ---> Connections ---> InfluxDB:

Select "Add new Data Source" then follow the below steps to establish connection to your InfluxDB:

- Change Query Language from Influxdb to Flux
- Enter <http://localhost:8086> as the URL
  - Make sure your containers are running on the same network. You can verify this via the Portainer Web GUI
- Enter your Influxdb details, and then save&test

A screenshot of the 'InfluxDB Details' configuration form in the Portainer Web GUI. The form has a dark theme and contains the following fields:

Organization	homeLAB
Token	.....
Default Bucket	proxmox
Min time interval ⓘ	10s
Max series ⓘ	1000

If your connection is successful, you'll see the following message display:

✓ datasource is working. 4 buckets found

Next, you can start to visualize data by [building a dashboard](#), or by querying data in the [Explore view](#).
