

The Dashboard

With your connections set up, you can build your dashboard. There are many templates on Grafana to choose from, or you can create your own. I chose to use the Proxmox Cluster [Flux] dashboard. See below:

Navigate to Home ---> Dashboards ---> Import Dashboards in the Grafana Web GUI:

Here, import the [Grafana template ID](#), then select load, and adjust name your Dashboard, then click Import:

Options

Name

Folder

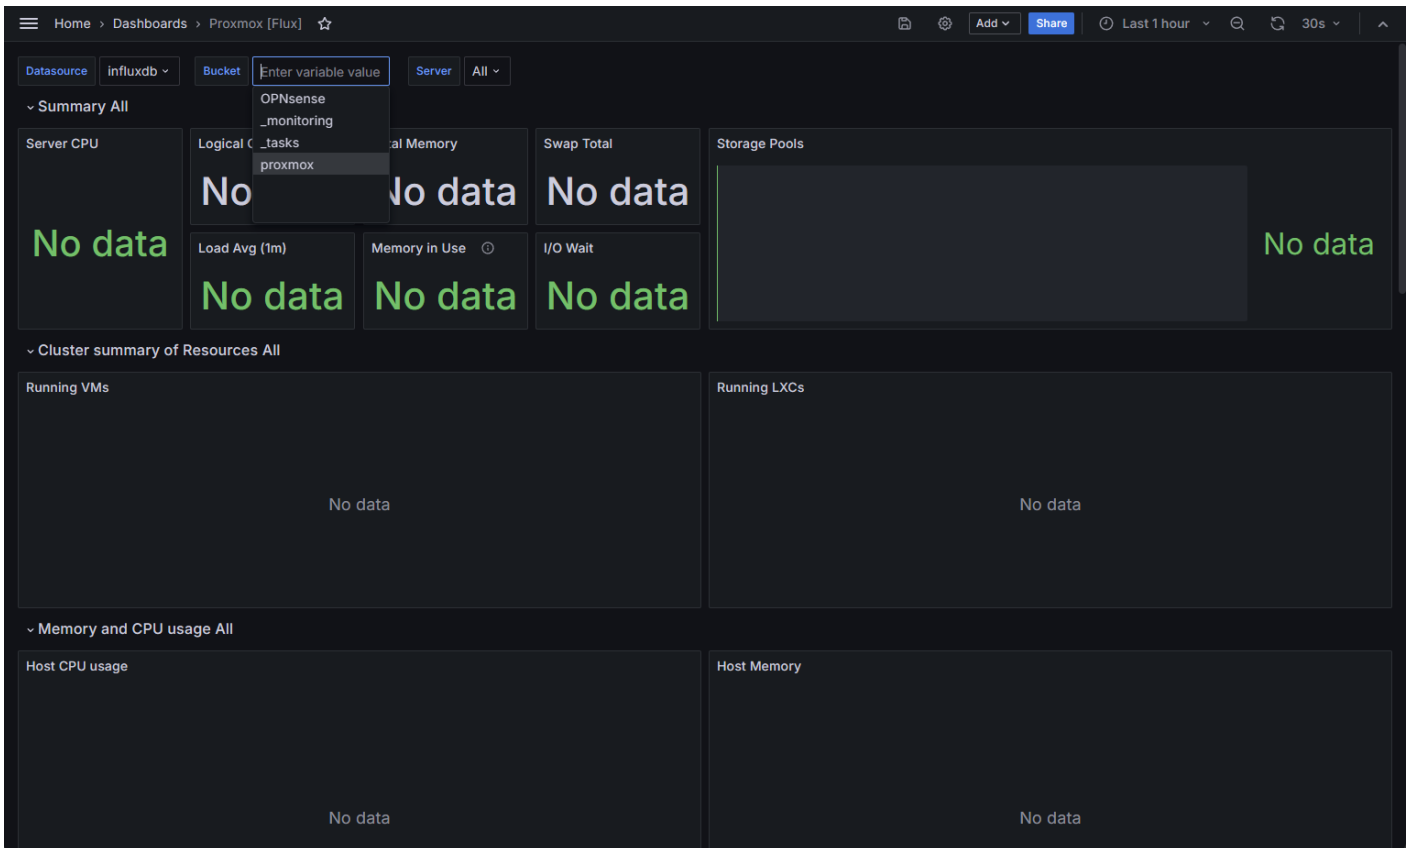

Unique identifier (UID)
 The unique identifier (UID) of a dashboard can be used for uniquely identify a dashboard between multiple Grafana installs. The UID allows having consistent URLs for accessing dashboards so changing the title of a dashboard will not break any bookmarked links to that dashboard.

 Change uid

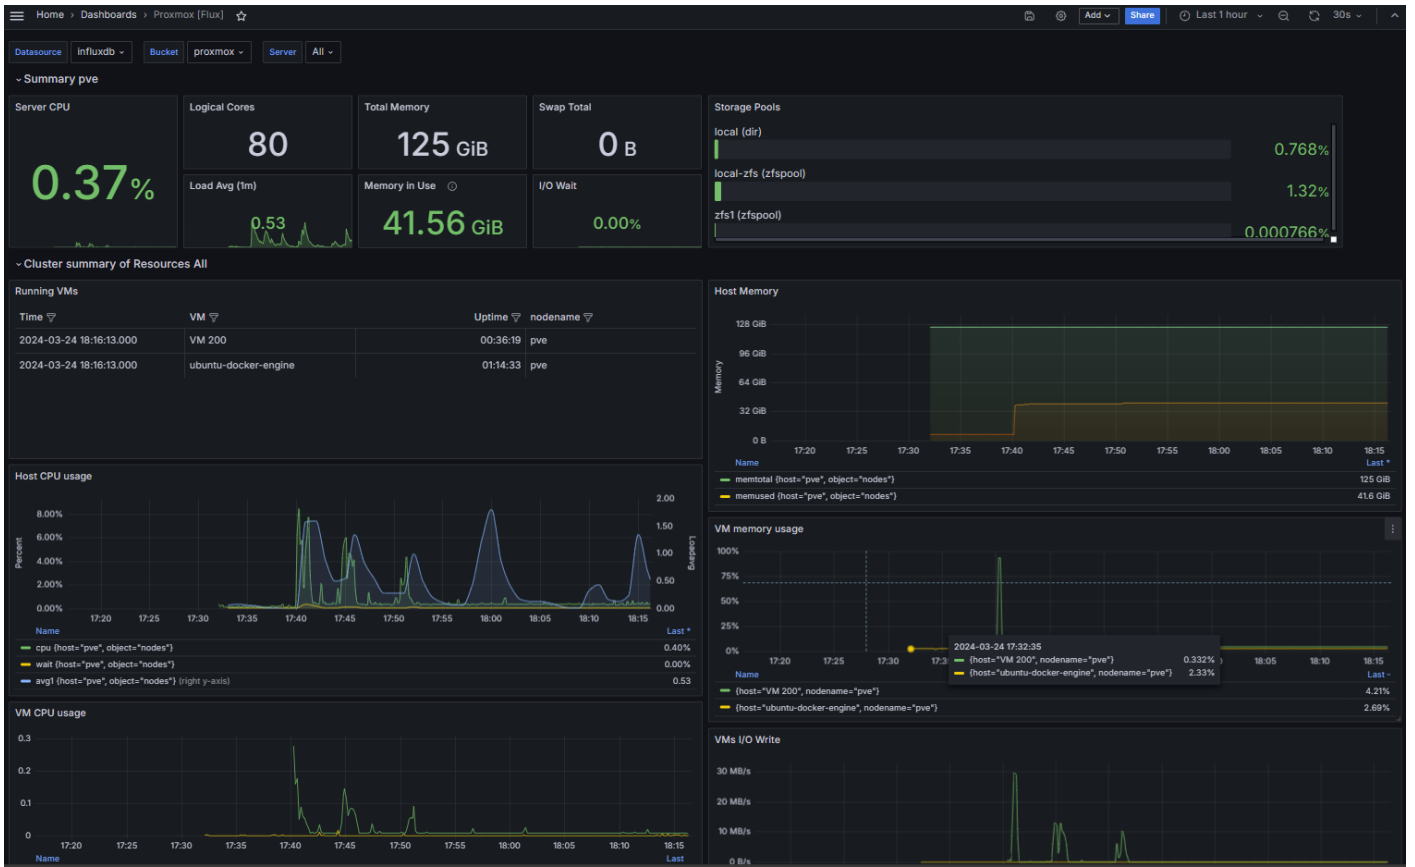

proxmox-flux

Import Cancel

Once loaded, you'll need to select your InfluxDB bucket:

Your dashboard is all set!
