# Cloud Management Portal

ZenArmor allows you to also manage your firewall via their cloud console. Once configured and set up with your ZenArmor account, you can configure and manage several deployments of ZenArmor to the same extent as you could via OPNsense. Cloud Management can be enabled and configured via the Cloud Management Portal within the ZenArmor Settings.

Once configured, you can access your firewall via the web interface...

Your home dashboard on Zenconsole is quite similar to what you'll see in OPNsense, and can be configured to show you just about any statistic or metric you'd like to see!
